## *Technologies*

I have learned a new programming language at every company I have worked for. I am very confident in my skills to adapt to new technologies and situations quickly. However, I enjoy and frequently use

Typescript / JavaScript  
React

GraphQL  
CSS & SCSS

NodeJS  
PostgreSQL

## *Open Source*

### **Lovely Inbox**

[github.com/LoveAndCoding/lovely-inbox](https://github.com/LoveAndCoding/lovely-inbox)

Electron desktop app designed with the goal to make email inboxes more useful.

### **IMAP Library**

[github.com/LoveAndCoding/imap](https://github.com/LoveAndCoding/imap)

A Typescript port and modernization of the NodeJS IMAP client library.

## *Education*

### **Bachelor of Science in Informatics**

University of Washington, 2007 to 2012
